

Do you have **control** over implementation of **Supply and Quality Agreements** with your CMOs? Do you struggle with reconciliation of **CMO manufacturing** and **quality data**?

Mosymphony enables CMOs from across the globe to collaborate with their customers (or Brand Owners) in implementation of Supply and Quality Agreements.

A consistent set of processes makes it possible to standardise the entire procure-to-pay process, thus enabling data integrity. This eliminates the need for

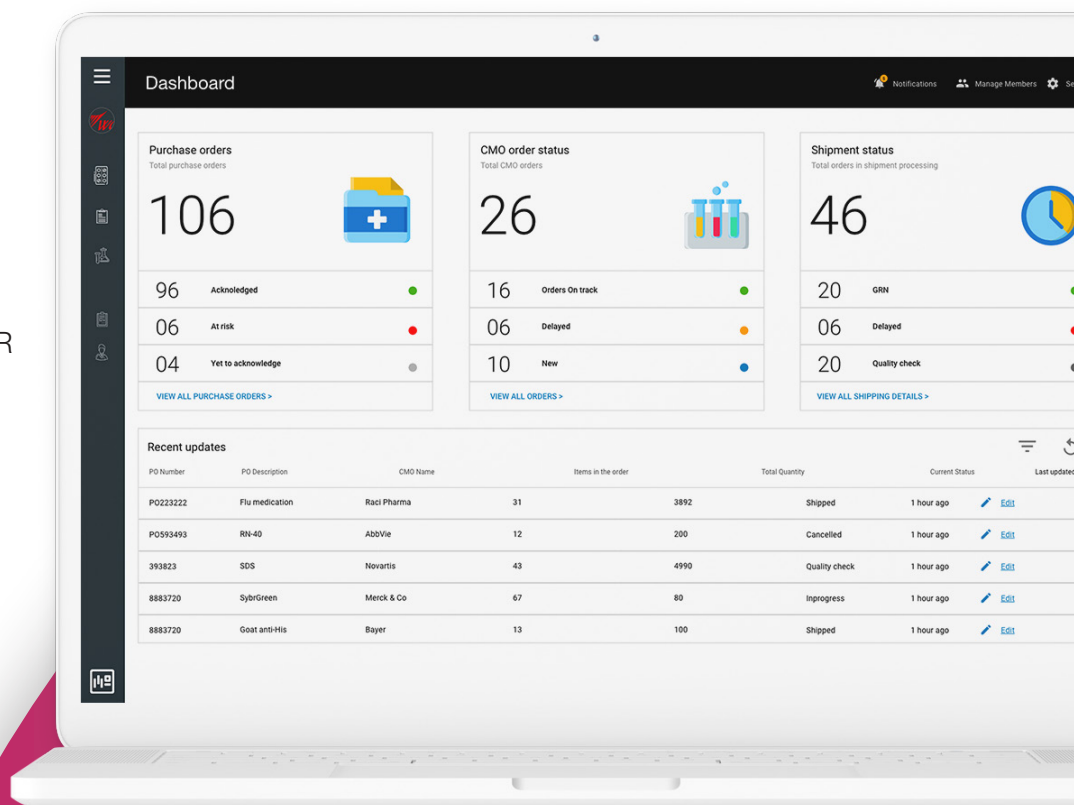

reconciliations that take about 80% of your External Manufacturing teams.

Ultimately, the Brand Owner and CMOs benefit from high level of compliance adherence with cGMP guidelines.

Mosymphony is an **award-winning, Enterprise Blockchain-powered, Azure-hosted** Software as a Service platform for the **global life sciences industry**

Mosymphony enables:

-  Transparent Supply Chain Operations **Visibility**
-  Remote Batch Release with real-time COAs, BMR, & BPR **Control**
-  Immutable Manufacturing, Inventory, & Quality Data **Compliance**
-  Standardised Processes **Data Integrity**

Implementation of Supply Agreements

Supports full PO lifecycle, from issuance of PO to shipments & payments across multiple partner firms.

Implementation of Quality Agreements

All aspects of quality-related procedures are implemented. *For example, Batch Release requires a Certificate of Analysis to be provided.*

Data Integrity

Implementation of mandatory data standards.

Compliances

With GDPR, 21 CFR Part 11, and GAMP 5 requirements and guidelines.

Simplicity

Designed for simplicity, cuts training time for users to a minimum. Time to value in weeks rather than months.

Mosymphony helps Brand Owners and CMOs **collaborate effectively**, eliminating the need for manual activities such as emails, phone calls, site visits, and weekly status reviews.

Mosymphony is hosted on **Microsoft Azure**

Hosted fully on Azure, Mosymphony leverages core capabilities of Azure platform enabling reliability, availability, and scalability along with unprecedented security of the platform.

About **Schrocken**

Schrocken helps enterprises manage outsourcing with the same Operating Visibility & Control as internal execution.

Schrocken is accelerated by Accenture Ventures, R3, and Microsoft for Startups. Mosymphony was selected as a Top 5 product in NASSCOM Product Conclave 2019.
